

La Rosita News Letter 1/08/2020

Dear All,

It's time to give some news about "La Rosita». The arrival of the pandemic was rapid and the containment was sudden, long and unprecedented, it had been a long time since our "lives" had stopped like this.

The arrival of the pandemic was rapid, and the containment was sudden, long and unprecedented, it had been a long time since our "lives" had stopped like this.

For many manufacturers, it was a period of reflection, of interrogation, and then, life regaining its rights and our passions put us back in creative boiling.

We are lucky to be an established brand (db system was founded 17 years ago). and to have a loyal customer base that has grown steadily year after year.

Many of you have kept in touch with us and continue to improve your equipment and audio systems. Thank you to all of you!

During this crisis, we have made a lot of device updates and helped you to implement them with the Team Viewer software.

At the same time, we have conducted research that will lead to new products.

Before I tell you about our new products, I would like to inform you that we will maintain the special rates on upgrades of our Airplay streamer to high resolution until the end of 2020.

- La Rosita Pi V3R => La Rosita Gamma HD or Black Hole DAC: **3800** euros
- La Rosita Beta New => La Rosita Delta HD or Neutron Star: **3000** euros
- Alpha New => Quark USB DAC: **1450** euros
- Alpha New => Quark HD streamer: **1985** euros
- Update of the mother board of the Computer part of the Black Hole II please consult us according to the desired configuration, SSD size, amount of RAM. Having said that, here is what we are preparing for September

1) Following the marvelous test obtained for our loudspeaker "La Montespan" in the German magazine "Image HiFi" and the great welcome of the public for our Babell loudspeaker during the last Munich show, we have programmed the arrival of a very high efficiency loudspeaker, the sketch of which we deliver you here. (next page)

[Munich 2019](#)

Compression drivers are the famous "GOTO Unit" hand built in Japan with extreme care, some people think they are simply the best in the world.

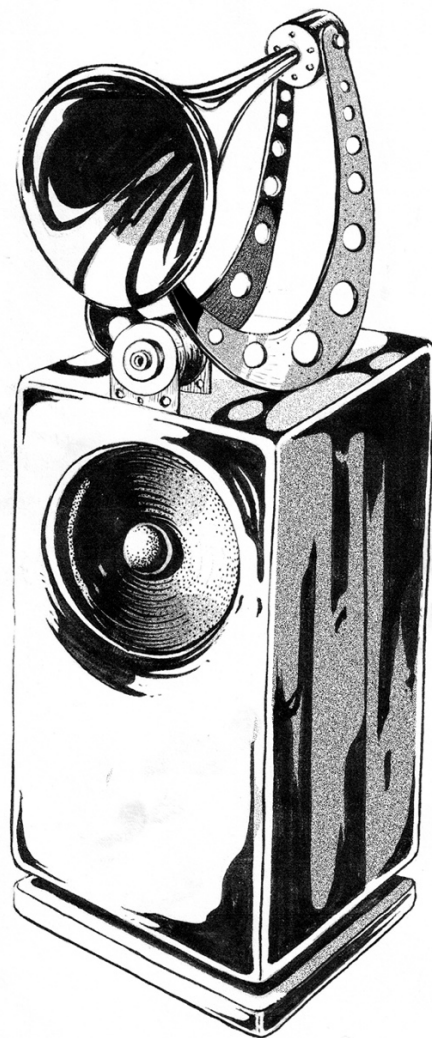

This model will be available in three versions, totally passive, semi active, totally active.
The code name of this loudspeaker is "L'Empereur" Price: please consult us.
To be released at the end of 2020.

A subscription purchase is launched now. (Please contact us)

2) A unique stereo tube amplifier which will be declined either as a power amplifier or as an integrated amplifier with volume control.

The particularity of this new amplifier is to use only tubes and transformers (Lundahl) in the signal path ensuring total transparency.

It will use a triode at the input and a 6CA7 Push/Pull stage in "Ultralinear" circuit. The power will be 2X35 watts (largely sufficient for the majority of loudspeakers).

No drawing for the moment but its manufacturing will begin in September and it will take over the design of our range of electronic tubes ZardoZ

The code name of this device is "Diego". Expected retail price, 15900 euros.

We wish you a good summer in good health.

Dan Bellity and La Rosita Team
