

Qobuz Connect – A Proven Success Among Our Users

Dear Customers,

The recent update integrating Qobuz Connect into our La Rosita streamers has proven to be a true success, generating a high level of satisfaction among our users.

More and more of you are now listening to music via online platforms, and especially Qobuz, whose richness and audio quality have made it a reference in Europe.

This new version enables a direct connection, without any intermediary, between Qobuz servers and your device, delivering an exceptionally fluid and natural sound reproduction, while fully supporting high-resolution audio up to 24-bit / 192 kHz.

Control remains simple and intuitive, directly from your tablet or smartphone via the Qobuz application.

In addition, Spotify Connect is now also fully supported and handled with the same level of care and precision.

Upgrade Your Device

If your unit has not yet been updated, we invite you to contact us.

Our team will be pleased to assist you in upgrading your device and unlocking the full potential of this major evolution.
